

TURNKEY LINES

All-Fill International has the engineering expertise and experience to offer their clients a single-source service for all equipment within the packaging line. Machines are selected from specialist manufacturers following detailed discussions with the client to establish a specification. Functions such as container sorting/cleaning, capping and labelling can be incorporated into the filling line together with powder bulk feeding, metal detection and checkweighing systems.

A 120 per minute line for garden products with checkweigher feedback and screw capping.

Bespoke container handling including loading tables, conveying and buffer/accumulation units are tailored to suit the production and working practices. High and low level controls throughout the line ensure that each piece of equipment operates effectively and to its design capability.

Complete lines are fully assembled at our production facility in Sandy, Bedfordshire, where Factory Acceptance Tests (FATs) prove performance and compliance with specification. This pre-installation qualification and training at our premises ensures that when the line arrives on site, it can be installed, commissioned and put fully into production with the minimum possible disruption and delay. All-Fill International Limited take turnkey responsibility for the entire line, including all documentation, manuals and the assumption of warranties. From first discussions, we offer a single point of contact for specification development, order placement, project management, installation/commissioning and after-sales support.

Line for oral suspension antibiotics with integrated tare-and-gross weighing, bottle cleaning and aluminium ROPP capping.
